Strategic Management and Business Policy Globalization ...
Operations management is an area of management concerned with designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements.

Operations management - Wikipedia
NOTE: For hand computations and some computer programs, $H_0$ is assumed to be equal to the tailwater depth (TW). In such a case, computation of an exit head loss ($h_o$) would be meaningless since the energy grade line in the culvert at the outlet would always be the sum of the tailwater depth and the velocity head inside the culvert at the outlet ($h_{vo}$).
